

EduGenie – Functional Requirements

Project: EduGenie – Google Gemini Powered Learning Assistant

1. Introduction

Functional requirements describe the main functions and services that the EduGenie system should provide to students.

2. Functional Requirements

2.1 Question Answering

The system shall allow students to enter academic questions and receive clear and concise answers using AI.

2.2 Simplified Explanation

The system shall provide simple and easy-to-understand explanations for complex educational concepts.

2.3 Quiz Generation

The system shall generate educational quiz questions based on the topic or request provided by the student.

2.4 Text Summarization

The system shall accept educational text and provide a concise summary containing the important points.

2.5 Learning Path Recommendation

The system shall provide learning recommendations based on the student's selected topic or learning requirement.

2.6 User Input and Result Display

The web interface shall allow students to enter their requirements, select a learning task, submit the request, and view the generated result.

2.7 API Communication

The frontend shall communicate with the FastAPI backend through appropriate API endpoints to process student requests.

2.8 Error Handling

The system shall display an understandable error message when an AI request, API connection, or configuration fails.

3. Conclusion

These functional requirements define the core features of EduGenie and ensure that the system provides useful AI-powered learning support to students.
