

EduGenie – Software & Hardware Requirements

Project: EduGenie – Google Gemini Powered Learning Assistant

1. Introduction

This document describes the software and hardware requirements needed to develop, run, test, and deploy the EduGenie learning assistant.

2. Software Requirements

Software / Technology	Requirement
Operating System	Windows, macOS, or Linux
Programming Language	Python
Backend Framework	FastAPI
Web Server	Uvicorn
Frontend	HTML and CSS
AI Service	Google Gemini API
Template Engine	Jinja2
Development Environment	Visual Studio Code or another Python-compatible editor
Web Browser	Google Chrome, Microsoft Edge, or Mozilla Firefox
Version Control	Git and GitHub

3. Hardware Requirements

Hardware	Requirement
----------	-------------

Processor	Modern dual-core processor or better
RAM	4 GB minimum, 8 GB recommended
Storage	At least 5 GB of free storage
Internet Connection	Stable internet connection for Gemini API requests and deployment
Display	Standard display suitable for software development and testing

4. Conclusion

The above software and hardware requirements provide the basic environment needed to develop and operate the EduGenie – Google Gemini Powered Learning Assistant.
