

EduGenie – Project Milestones

Project: EduGenie – Google Gemini Powered Learning Assistant

1. Introduction

Project milestones represent the important checkpoints used to track the progress of the EduGenie project.

2. Major Milestones

<u>Milestone</u>	<u>Description</u>	<u>Status</u>
M1 – Problem Identification	Identify the learning problems faced by students.	Completed
M2 – Idea Selection	Select EduGenie as the proposed AI-powered learning solution.	Completed
M3 – Requirement Analysis	Define functional, non-functional, software, and hardware requirements.	Completed
M4 – System Design	Prepare architecture, data flow, module design, and UI design.	Completed
M5 – Backend Development	Develop the FastAPI backend and connect the required modules.	Completed
M6 – AI Integration	Integrate the Google Gemini API for AI-powered learning features.	Completed
M7 – Frontend Development	Develop the web interface for user input and result display.	Completed
M8 – Testing	Test the major EduGenie features and handle common errors.	Completed
M9 – Documentation	Prepare project documentation and supporting materials.	In Progress
M10 – Demonstration	Demonstrate the completed EduGenie application.	Planned

3. Milestone Tracking

The milestones help track the progress of EduGenie from problem identification through development, testing, documentation, and final demonstration.

4. Conclusion

The milestone plan provides clear checkpoints for monitoring the progress of the EduGenie project and helps ensure that each major stage is completed systematically.
