

EduGenie – Define Problem Statements

Project: EduGenie – Google Gemini Powered Learning Assistant

Problem Statement 1

Students need a simple way to ask academic questions and receive understandable answers without searching through multiple sources.

Problem Statement 2

Students may find complex educational concepts difficult to understand and need simplified explanations.

Problem Statement 3

Students need an easy way to generate quizzes and test their understanding of learned concepts.

Problem Statement 4

Students need a tool that can summarize lengthy educational content for easier revision.

Problem Statement 5

Students need personalized recommendations to identify what topics they can learn next.

Overall Problem Statement

To develop an AI-powered learning assistant that helps students understand, practice, summarize, and plan their learning through a single accessible platform.
