

EduGenie – Empathy Map

Target User: Student / Learner

The empathy map identifies what students say, think, do, and feel when they encounter learning difficulties.

SAYS	THINKS
I don't understand this topic.	Which topic should I learn next?
Can someone explain it simply?	Am I understanding this correctly?
I want to test myself.	How can I revise this quickly?
I need a quick summary.	
DOES	FEELS
Searches for explanations	Confused when concepts are difficult
Reads study materials	Overwhelmed by lengthy material
Practices questions	Motivated when learning becomes easier
Revises before exams	More confident after understanding a topic

Key Insight

Students need a convenient learning assistant that reduces confusion, supports quick revision, provides practice opportunities, and helps them decide what to learn next.
