

EduGenie – UI Design

Project: EduGenie – Google Gemini Powered Learning Assistant

1. Introduction

The EduGenie user interface is designed to provide students with a simple and easy-to-use environment for accessing AI-powered learning features.

2. Main Interface

The main page contains the following components:

2.1 Application Title

The application displays the name **EduGenie – Google Gemini Powered Learning Assistant** at the top of the page.

2.2 Task Selection

A task selection option allows the student to choose the required learning function.

The available tasks include:

- Explain
- Q&A
- Quiz
- Summary
- Recommend Path

2.3 User Input Area

A text area is provided where the student can enter a question, topic, educational passage, or learning request.

2.4 Submit Button

A submit button allows the student to send the request to the backend for processing.

2.5 Result Area

After processing, the generated response is displayed in a result area on the same page.

3. User Interface Flow

AI Generated Response	

4. UI Design Principles

The interface follows these principles:

- Simple and user-friendly design.
- Clear task selection.
- Easy-to-read text.
- Minimal and clean layout.
- Easy access to AI learning features.
- Clear display of generated results.

5. Conclusion

The EduGenie UI is designed to make AI-powered learning simple and accessible. Students can select a learning task, provide their input, and view the generated result through a single web interface
